

## Prism PointeTechnologies

---

[Prism Pointe Technologies](#) (PPT) has been a leader in the electronic device repair business since 2001. The company currently employs more than 230 individuals within the United States and around the world.

Prism Pointe's goal for BTA dealers is to extend their service capabilities beyond their current service territories. This allows the dealer to engage in enterprise opportunities anywhere in the United States.

Because PPT is a service-only company, there is no exposure to stealing accounts by exposing the dealer's customers to other dealers. PPT is interested in providing not only the highest levels of service to its customers, but also backup for MPS opportunities.
